MEMORANDUM FOR: Director of Central Intelligence

FROM: John F. Blake
                   Deputy Director for Administration

SUBJECT: Hiring of Military Annuitant: [   ]   STAT
                   Colonel, United States Air Force

    1. Action Requested: The Office of Training (OTR) would
like to hire a military officer who will retire on 30 June 1977.
He is uniquely qualified in the field of information science
and OTR has been unable to identify other qualified individuals
within the Agency.

    2. Background: The Information Science Center of the
Office of Training has been trying for at least four months to
identify an instructor qualified to teach quantitative methods
to Intelligence Community students. We have been unable to
identify an officer with suitable qualifications after putting
out two Agency-wide vacancy notices advertising this position.
This problem was encountered earlier while finding a replace-
ment for a less demanding vacancy. Because of the paucity of
applicants in the open market, over twenty months elapsed before
a replacement was recruited and hired. None of the earlier
applicants were adequately qualified for the current vacancy,
and no potential applicants are known now. [   ]   STAT
[   ] is about to retire from the United States Air Force and
is uniquely qualified to teach this subject. A graduate of
West Point, [   ] later received an M.S. in Mathematics
from the University of Illinois. His primary duties in the Air
Force were as weather officer (nine years) and as an instructor
and training administrator in mathematics and information science
topics (twelve years). He is presently on the faculty of the
Industrial College of the Armed Forces (biographic sketch
appended).

    3. Recommendation: It is requested that you permit the
Office of Training to begin processing of [   ] for   STAT
eventual employment in the Information Science Center.
